1918 / CONSTRUCT ENHANCED FLIGHT LINE SECURITY ON BASTION

Requesting Unit	3D MAW (FWD)
Location	Camp Bastion
Requirements	Run concertina and barbed wire from e-stakes to tie in with barriers and existing obstacles. Fabricate hedgehogs to funnel and create lanes for traffic. Place HESCO barriers to deter vehicles from by-passing ECPs.
Failure Risk	If security enhancements are not constructed, the potential for unauthorized vehicles and personnel is ever present. Without the ability to screen all persons, equipment and vehicles all personnel and equipment on the flight line as well as living areas and workspaces are at risk.
Priority Code:	[4.1]

Approved for Release
