(TT0009) Domies Patrol Police Station: PTT arrived at Domies Police Station to meet with COL [redacted] to ascertain if there were any problems that they may be having in the station or area. There were no problems to report. Domies IP arrested three AIF who were observed by an IP patrol. Irbil [redacted]

(MI0275) Irbil Provincial JCC: The PTT continued with the development of the response plan for the region. The focus was a portion of the plan outlining potential scenarios and attempting to determine agencies responsible for dealing with various aspects of those scenarios. Since the KRG has no established Emergency Management Coordinator or Incident Commander, every scenario will potentially have a different Incident Commander depending on the situation. This would not pose a real problem, unless one agency did not want another agency to be in charge of a particular situation, even on a temporary basis. During previous discussions with command staff at the PJCC, the PTT was advised this was one of the bigger problems within the entire law enforcement community in the region, as well as not being able to pass along information to other agencies in a timely manner because of restrictions placed on policemen and officers by higher command staff.

The upper command staff in the region feels that it is not the responsibility of a junior officer or an IP to release any information at all to another agency or commander. This makes it appear that the level of cooperation is not where it should be. The PTT is trying to work with senior command staff at many of the agencies as well as KRG officials to try and solve these type problems. The PTT will continue with discussions and the development of this plan as well as Standardized Operating Procedures for the operations room at the PJCC.

(MI0905) Airport Security Station: PTT met with LT [redacted], representing General [redacted], at the Erbil International Airport Security Station to work on the Security requirements for the new airport. LT [redacted] advised they need more justifications for the recommendations put forth. He advised they need more canine coverage than recommended by PTT. One area of concern was the cargo terminal. PTT agreed to add the canine recommendation. Another area discussed was sniper requirements. PTT stressed the importance of having each man in charge of his own rifle and no one else be allowed to use it. PTT explained each person has different sighting techniques than other persons and the optics must remain set for that individual. LT [redacted] advised they have hired no new security people recently. They are waiting for the final approval of the security recommendations for personnel as well as the new training center at the airport before hiring additional personnel.
