(b)(6), (b)(7)c

PTT also spoke with LT Major [redacted], a mechanical engineer in charge of IP vehicles and vehicle repair for the entire province. Also present was Captain [redacted], commander of vehicles for Provincial Headquarters Police Station. There were several areas of concern regarding IP vehicles throughout the province. Lt Major [redacted] stated he wishes to repair all of the vehicles brought to him but the lack of such a facility

(b)(6), (b)(7)c

(b)(3), (b)(6), (b)(2)

prohibits some repairs and more money is spent to contract out some of the work that could be done provided a facility was available. Lt Major [redacted] stated they had a site just North of Nasariyah for such a facility.

(b)(6), (b)(7)c

Parts for broken vehicles seemed to be a major issue as well. Lt Major [redacted] stated parts were very difficult to obtain due to the lack of funding. He stated they are allotted 114 million dinar per year for vehicle maintenance and approximately 400 million is required. He stated that the station received approximately 600 million dinar for furniture and only 114 million for vehicles. His concern was that priorities are not in order.

(b)(6), (b)(7)c

Captain [redacted] advised team members that the Ministry of Interior had given them permission to sell approximately 20 vehicles on the local market due to the fact that the vehicles could not be repaired.

(b)(6), (b)(7)c

Lt Major [redacted] also stated they needed a diagnostic computer to diagnose particular problems with vehicles instead of using guess work and unnecessary parts to diagnose a problem.

The only other area of concern regarding vehicles was the lack of mechanics to conduct repairs. At this time there is only one mechanic for the whole province.
