the Quality Assurance unit for Ninewah. PTT advised BG [redacted] of problems with police district commanders who fail to support providing their IP's with training. BG [redacted] was not aware of this problem and would investigate this allegation before making any attempt to find a solution.

These request include but are not limited to, unable to locate witnesses who have moved with no forwarding address; unable to locate/identify a suspect, who gave false information and has already been released; and information from other Provinces in Iraq. PTT has seen a major improvement in the movement of cases from the initial arrest, to the investigation, then to the IJ for review, and finally to the CCCI courts for prosecution. Theses 35 cases, forwarded from one investigator, are more MTU cases presented to the courts for prosecution than all the MTU cases added together during the last session of the CCCI courts. the PCOP, then stated and signed a document that the allegation was not his and that the signature on it was not his.
P-PTT inspected the ongoing security measures in place. The males standing guard duty at the entrance gate refused to maintain their posts because it is Ramadan and they were tired. When they were threaten with docking their pay for the day, they responded with they didn't care. When the Security Chief was notified, he responded that Coalition Forces had taken away his ability to give immediate corporal punishment to discipline the IP for this type of action and there was nothing he could do.

The classroom that Coalition Forces (CF) have used in the past to conduct training appears to have been taken away. CF has already incurred many problems in securing the classroom for training because it is/was used for many other purposes. The PCOP now wants to use it as his operations center. C-Wire is to be placed in an area on the north side of the station that abuts an open area and an alleyway that offers unregulated traffic into the station compound is to be blocked. The military is submitting the plan to local contractors for bid and funds are in the process of being approved.

She stated that the problems of the IP badges are being compounded every time a new class of IP graduates from training. The IP that have been issued weapons are getting there weapons confiscated by IA and Coalition Forces. PTT advised Lieutenant [redacted] to begin preparing input for a consistent training regimen and what assistance PTT can provide as soon as possible. (BB0043) Babil Iskandariyah IHP Station: (TRA Level 2) PTT made contact with on-duty shift commander Captain [redacted]. Captain [redacted] advised an IP patrol was attacked by small arms fire near Checkpoint 18 on MSR Tampa. Captain [redacted] stated the attackers were approximately 300 meters west of the roadway and the IPs could not ascertain how many attackers were involved. Captain [redacted] stated there were no IP casualties but it is unknown if there were any AIF casualties as an after action reconnaissance was not performed. Captain [redacted] cited a fear of ambush, lack of available personnel, and the low fuel level of the attacked IP vehicle as the reason for this lack of reconnaissance.

PTT discussed force protection issues at the IHP compound and inquired as to whether IP's performed any sort of regular patrols immediately outside the compound's walls. Captain [redacted] replied that such patrols were only conducted when tower guards observed something suspicious in the area. Due to the lack of nighttime illumination outside the compound's walls, PTT recommended that random daily patrols inspect the area immediately outside the compound's walls (suggesting out to 200 meters) to ensure no activity is occurring that the tower guards might not have been able to see. Captain [redacted] was receptive to PTT recommendations and stated he would confer with Captain [redacted] regarding implementation of the recommendations. The remainder of the PTT visit consisted of the military element of PTT itemizing equipment requests from Captain [redacted]. Captain [redacted] requests included PKC ammunition, PKC machineguns and body armor. In regards to the PKC machineguns and body armor, Captain [redacted] advised PTT that the Station currently has an adequate supply of these items to outfit IPs for their daily duties; however, due to daily wear and tear the machineguns and body armor are quickly becoming unserviceable. Captain [redacted] also stated that the Station is still unable to obtain ample quantities of gasoline to fuel their patrol vehicles. Captain [redacted] stated all the aforementioned supply issues had already been forwarded thru the IP chain of command multiple times and that the Station has yet to receive a response from the District or Provincial level regarding these issues.

The time and date was given to all the department heads.

SWAT: Ongoing meetings are being held to develop, support and explain the command structure, leadership roles and address outstanding needs for the unit to become operational. During these meetings, it is becoming more and more evident as to why the IP

structure is inept. As of this time the unit is supposed to be operational. However, there is no way they can possibly respond to a call, as they are yet equipped to do so. The unit has no ammunitiob, inadequate radio communications, no phone service and no crew served weapons for vehicles or over watch positions. The Team was informed that the IP logistics warehouse received 300,000 rounds of 7.62 X 39 ammo from MOI earlier this week along with PKCs and AK-47s. The needed ammo and PKC's have been promised to the SWAT unit by MG [redacted]. However, COL [redacted] will not release the weapons or ammo until yet another document is signed by the MG.
