Babil [redacted] (b)(3), (b)(6)

(BB0032) Babil Provincial Police HQ: The PTT met with Lt. Colonel [redacted] (b)(6), (b)(7)(c), Logistics commander, and learned PHQ received 74 PKC machine guns from the MOI Logistics this week. IP's were sent to Baghdad MOI to pick the weapons up. Originally, the team spoke with a member of CPATT MOI Logistics and he advised his database showed Babil Province was to receive 166 PKCs. MOI Logistics in Baghdad only issued 74 PKCs to LTC [redacted] (b)(6), (b)(7)(c). The team was given a receipt from the station that showed they only received 74 PKC's. The team will make contact the member of CPATT MOI Logistics to discuss the difference in number of weapons. Along with the 74 PKCs there were 200 rounds of ammunition to go with each weapon, for a total of 14,800 rounds. The team also spoke with 2nd Lt. [redacted] (b)(6), (b)(7)(c) who is in charge of supply at Al Hillah SWAT HQ and learned that in March, 2007 they picked up approximately 50 PKC's from the US Army at FOB Kalsu. He reported, they test fired at least 20 weapons and they all misfired. The Lt. advised that even though the PKCs were wrapped in plastic when received, the weapons were not new, but had been refurbished with new paint and old parts. The IP's cannot repair them because there are no spare parts available for the weapons. The team advised, they will be fazing-out the older IP weapons and replacing them with M-4 type weapons.

(BB0038) Tunis Local Police Station: PTT met with Captain [redacted] (b)(6), (b)(7)(c), Deputy Commander, and asked if there were any results from the ongoing investigation into the mosque bombing that occurred in Tunis the previous week. The Team then asked the Lt. if he could relay details of any current case he was investigating. He could not cite any specific case he was investigating, but did mention that he intended to interview a suspected insurgent that is currently incarcerated in Iskandariyah for suspected insurgent activities in Tunis' jurisdiction. (BB0039) Al Ameen IHP Station: PTT met with Captain [redacted] (b)(6),(b)(7)(c), commander, and discussed incidences of IED attacks within his jurisdiction along MSR Tampa. He attributed this rise to the fact that his Police vehicles do not have sufficient fuel to conduct regular patrols, his IP's lack night vision equipment to aid in detecting IED emplacement teams in the darkened areas along MSR Tampa and a shortage of PKC ammunition which prohibits his IP's from maintaining superior firepower against the insurgents. The team reiterated coalition forces could not assist with the night vision equipment or the fuel issues, but did state they would attempt to procure some PKC ammunition via military channels.

The team assessed the station's major incident reporting procedures. The Captain was able to immediately produce all written incident reports regarding major incidents that IP's had been involved in for the year. The team reviewed a sampling of these reports, which were handwritten on plain paper and found them to be surprisingly concise and detailed. The team discussed with the Captain, the idea of utilizing formatted reporting forms to track a variety of issues and functions within his station. He was receptive to the idea and the team intends to produce some sample forms to review with the Captain in hopes of establishing a more uniform record keeping ability within the station.
