I, (b)(3), (b)(6), WANT TO MAKE THE FOLLOWING STATEMENT UNDER OATH:

On 8 September, 2008, I was the flight medic assigned as the flight medic on (b)(2)High At 307Z hrs we responded to a 9-line request IVO Ganjgal valley. The request was for two urgent-surgical patients. Once on station we linked up with a SWT, and they stated the ground forces were still in heavy contact with AAF. CW(b)(3), (b)(6) conflicted the airspace as we held off just west of the TIC. We pushed the ground frequency and listened to the ground battle develop. As we were in orbit it witnessed the SWT engaging enemy locations coordinated by the ground forces. The ground forces stated the were being engaged in three directions. The ground forces stated they had injured and were attempting to set up a CCP in the valley. A CCP was established in the valley. The ground forces stated they were still in heavy contact. I witnessed the SWT make multiple engagements. By listening to the ground forces give know AAF positions by terrain features and generic compass direction. SWT identified a location to come in for the patient pickup. CW(b)(3), (b)(6) announced a one minute inbound call over the radio. As we landed at the CCP I exited the right side of the helicopter to identify a patient. I saw a soldier in ACU covered in blood holding his neck. He was approximately 50 meters from the helicopter on the right side below a rock wall. No additional patients were identified at that location. I carried the patient to the helicopter and loaded him on the floor. Once in the aircraft, I gave care of the patient to Capt(b)(3), (b)(6) as I need to clear the airspace on the left side. As we began to take off, I saw seven distinct muzzle flashes in my direction at the 8 o'clock position approximately 300 meters away. ANSF soldiers witnessed the fire as they began to engage the muzzle flashes. I returned fire with my rifle until we cleared the CCP. The soldier was shot in the right lower portion of his neck. He was showing signs and symptoms of hypovolemic shock. We controlled bleeding by the use of hemostatic agent and direct pressure. The patient was transported to FOB Wright FST. When we arrived to the LZ there was no FLA for patient transport. S(b)(3), (b)(6) to the PZ control to get a gator. I was able to start a large bore IV line to begin a fluid challenge. Cap(b)(3), (b)(6) decompressed the right side of the patient's chest and placed him on high flow oxygen. The patient was loaded onto the gator as we continued medical care enroute to the FST. The patient was handed over to the FST surgeon. Once we reported (b)(2)High (b)(3), (b)(6) stated we were enroute to the same location to pickup more patients. We linked up with the SWT and they reported the ground forces were still in heavy contact with AAF. CW(b)(3), (b)(6) coordinated with the SWT to identify casualties and locate an appropriate CCP for pickup. We were held off for an unknown time so SWT could suppress the AAF. We entered the valley to pick up 3 patients. Once on the ground 3 ANFS soldiers were loaded onto the aircraft. We exited the location and transported the 3 urgent patients to FOB Fenty FST.

nothing follows
