ABP reported IED FOUND on RTE MAYBERRY

## ASSESSMENT

Activity in N2KL remains decreased for another 24 hours. Attacks will increase over the next 24-72 hours as Ramadan celebrations conclude and AAF resume operations. In Nuristan, AAF will increase attacks IVO COP Keating and Lowell in the near term. Attacks will be disruptive in nature to screen to movement of MWE and stage for further attacks. More coordinated attacks may increase as AAF become aware of possible CF movement from the area. In Konar, AAF continue to target CF in the Pech district, centering their attacks on fixed locations. The decrease in activity over the last week is possibly a result of Ramadan associated celebrations. Additionally, AAF may be awaiting funding and guidance for future attacks. Attacks will mainly consist of stand-off style attacks in the near term as AAF continue movement of MWE into the area and observe CF TTPs. In Laghman, activity remains low. AAF will increase emplacement of IEDs along MSRs to disrupt CF patrols and intimidate LNs in the area. An emerging TTP as of late has been emplacing IEDs the night prior to an attack is scheduled to take place. In Nangarhar, activity remains decreased. AAF will emplace IEDs and conduct small arms fire attacks against ANSF/CF in southeastern provinces. These attacks will be used to slow CF patrols, facilitate illicit activity and protect freedom of movement. AAF have reportedly met and have decided to target road construction projects and attempt to kidnap NGOs working on these projects, likely to hinder infrastructure improvements, garner funding and challenge the GIRoAs ability to provide for, or protect the people.

# 24-48 THREAT REPORTING

As of: 09/21/2009 5:00 D+

MTN WARRIOR

"Led by Love of Country" "All The Way"

SECRET //REL TO USA, GCTF, ISAF, NATO

5

## Laghman:

- Reporting indicated COP Najil and the Dowlat Shah District Center would be attacked after Ramadan. Attacks conducted will potentially be seen at the end of Eid, which may occur as soon as the next 24-48 hours.

## Konar:

- Reporting indicates **AAF plan to attack COP Monti during the next 24-72 hours**. AAF will likely engage the COP with IDF, as historically seen in attacks targeting the CF base.
- AAF will conduct attacks on CF IVO COP Michigan sometime after the conclusion of Eid.**
- AAF will continue to conduct attacks targeting CF patrolling elements operating in eastern Pech and western Dara Noor.

## Nangarhar:

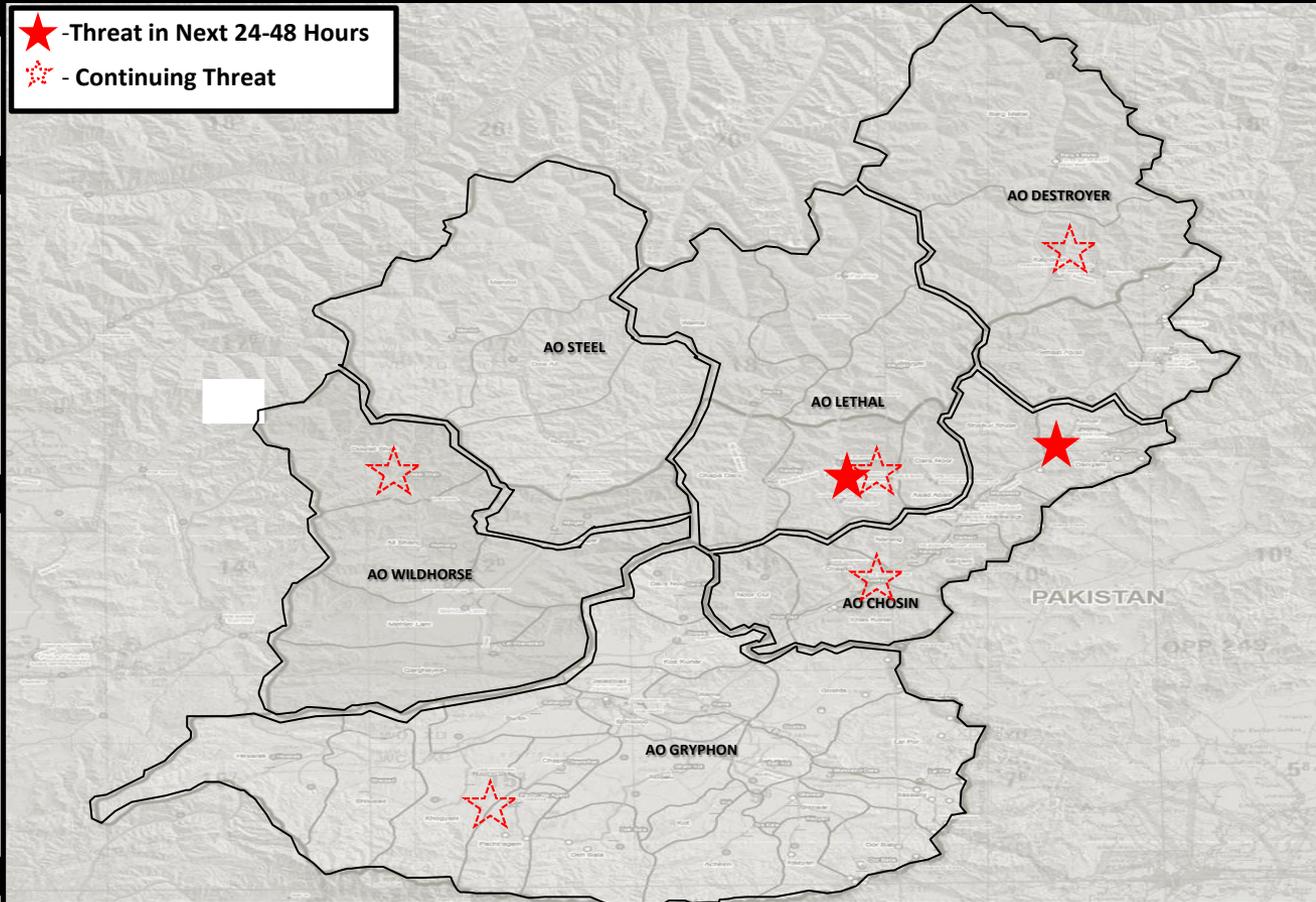

- Earlier reporting suggested AAF planned to attack the Pachir Wa Agam District center on 19 or 20 SEP 09. This attack has yet to occur; it is possible this will occur following Eid, which could be as soon as the next 24-48 hours.
- Reporting indicates cross-border attacks against ABP OPs will occur at an unspecified time in SEP.
- AAF intend to conduct ambush-style attacks and kidnap foreign nationals working on road construction projects and ambush-style attacks in Khogyani and Pachir Wa Agam in the near future. (No time specified)

## Nuristan:

- AAF will continue to conduct attacks targeting COP Lowell and COP Keating in the near term.**

★ -Threat in Next 24-48 Hours

★ - Continuing Threat

## THREAT ASSESSMENT

- AAF will increase harassing direct and IED initiated attacks throughout Konar province to slow CF targeting and patrols in the area. Attacks will target CF bases throughout Pech and Dara Noor districts with IDF and SAF from stand-off distances. IED and ambushes along MSR Rhode Island will be emplaced to interfere with CF/ANSF operations in the area. Attacks will be most prevalent along western portions of Rhode Island due to AAFs freedom of movement and unpared surfaces.
- The presence of multiple AAF leadership in Konar for a sustained period possibly indicates planning and staging for future attacks. AAF are possibly awaiting funding and supplies before being able to carry out multiple large-scale attacks which will potentially surround the conclusion of Eid. Attacks until then will primarily consist of IDF and other harassment style engagements as their main tactics.
- IED activity in southern Nangarhar will continue to screen and facilitate AAF and criminal activity in the area. Increased intimidation will also occur in these southern districts targeting both locals and ANSF to slow patrols and retain freedom of movement with GIROA interference.

## AAF INTIMIDATION/ NEGATIVE EFFECTS

## ASSESSMENT

IO in the Mountain Warrior AO for this week highlights multiple exploitable facets. Reporting this week shows rifts forming between AAF members and groups, especially between the Taliban and HiG, in the Konar province. These rifts will likely cause a lack of collaborative, concerted efforts between the groups conducting attacks against CF in the near term. The reported fusing of the Taliban, Salafis and Wahabis under the HiG due to perceived weakness could produce infighting as the groups, though they often collaborate on attacks, prefer to keep their autonomy. AAF continue to use intimidation tactics directed towards LNs throughout the AO and along the Pakistan border. AAF "punishing" villagers for voting and their continued destruction of infrastructure, which directly shows the AAF denying the Afghan populace from furthering their country's progress and disallowing the overall progression and any semblance of nationalism.

Mullah Sadiq, while against CF presence, is mostly Pro-GIRoA and has also been positively reinforcing the need for infrastructure in his area of influence in the Kamdesh area. Reporting states he intends to acquire a position within GIRoA and may be a potential candidate for reconciliation. This may be positive in the short-term but LNs may see this as condoning perceived corruption within GIRoA. Refugees returning to the AO has the potential to further AAF activity, especially in the Nangarhar area, as many people will not have jobs available to them. CF's ability to positively engage these refugees may deter them from associating themselves with AAF activity IOT garner money for their families. KLE's such as the one in TF Gryphon on 18SEP09 will be vital to progress and further CF/GIRoA support throughout N2KL.

- DF
- COMPLEX ATTACK
- IED DET.
- IED FOUND
- IDF
- OTHER
- △ HUMINT
- SIGINT/OTHER
- ◆ ACTIVE OBJ
- ▲ NIGHT LETTER
- ★ CF BASE

## ASSESSMENT

- SIGACTS during the past week have decreased in comparison to both previous weeks and 2008 trends; this decrease in activity can be partially attributed to AAF's continued attempts to stockpile weapons with winter approaching, infighting between AAF groups, and an emphasis on meetings to plan future attacks; during the past 24 hours, AAF conducted little attacks likely due to Eid al-Fitr celebrations
- For the near term, CF can expect to see continued stand-off style attacks targeting CF bases and patrolling elements; AAF will likely continue to attack CF static locations that are located along key AAF facilitation routes in an attempt to divert CF attention from AAF movement of MWE into the Konar Province; AAF continue to plan for attacks that will be conducted in the next few weeks prior to the onset of winter months
- AAF will carry out attacks targeting COP Monti in the next 24-72 hours, attacks will consist of IDF and originate from the Cheshan Ghar Mountains, which is the historic POO site for attacks on the COP; AAF have increased attacks targeting COP Monti during the month of SEP IOT divert CF focus from AAF facilitation of MWE into northern Konar

- ★ CF BASE

**So What...**  
 AAF WILL CONDUCT SPORADIC ATTACKS TARGETING CF BASES IN THE KAMDESH DISTRICT IN THE NEXT 24-72 HOURS; ATTACKS MAY BECOME MORE COMPLEX AS AAF BECOME AWARE OF CF WITHDRAWAL FROM THE AREA.

## ASSESSMENT

- Over the past week, AAF within Nuristan have slightly decreased attack levels in comparison to prior weeks' trends; expect to see a continued decrease in kinetic activity during the near term as the majority of prior attacks were focused on Barge Matal Village prior to CF withdrawing forces from the area; activity in western Nuristan will continue to remain minimal in the upcoming weeks
- CF can expect to see sporadic attacks targeting COP Lowell, COP Keating and OP Fritsche in the near term, as AAF are assessed to be in the middle of their attack cycle; AAF have historically conducted attacks in this area periodically over a course of 3-4 days, which is then followed by a rest/refit period lasting for only a short period of time; attacks targeting the CF bases in the area will consist primarily of DF attacks (SAF/RPGs)
- Attacks targeting CF in the Kamdesh District, namely COP Keating, had previously consisted of B-10 recoilless rifle; however, no attacks using B-10 fire have occurred since the 29AUG09 possibly due to the CF bomb drop on the area, indicating CF have either destroyed the weapon's system or ironically AAF have not been able to acquire B-10 ammunition since 29AUG09

NSTR

#### AAF Attacks Resulting in LN Casualties

NSTR

- Trends for Laghman this week indicate a decrease from last week; we can expect to see activity for this week to closely follow Laghman's 2008 trends
- AAF in the vicinity of Qala Najil are focusing on stand-off attacks; AAF are emplacing IEDs by burying them the night before an attack is scheduled to be executed in order to minimize the potential of being detained by ANSF/CF; expect to see continued use of CWIEDs in the Alishang District
- AAF are preparing for a large scale post-Ramadan attack targeting the Dowlat Shah District Center and Combat Outpost Najil
- AAF are removing the command wire from landmines after emplacing them in order to use the IED later; this TTP may explain the incomplete IEDs found in the NKL area

### So What...

IN THE NEXT 24-48 HOURS AAF WILL CONDUCT CROSS-BORDER ATTACKS AGAINST THE ABP POSTS IN DUR BABA DISTRICT. KIDNAPPINGS AND AMBUSH STYLE ATTACKS IOT DISRUPT ROAD CONSTRUCTION PROJECTS IN SOUTHERN DISTRICTS.

## ASSESSMENT

- For the second consecutive week trend analysis indicates a continued decrease in kinetic activity; this year's level of attacks remains below the 2008 historical trends which may indicate disruption caused by CF/ANSF operations; expect an increase in attacks after the Eid Al-Fitr holiday has passed and AAF attempt to expend munitions prior to the winter months
- Criminal elements in Nangarhar are using bribes to attain the release of detained AAF; bribes are paid in Pakistani Rupees indicating that Pakistan based insurgents are trying to utilize corruption to aid in the disruption of Afghanistan security
- Detained Taliban associates have taken advantage of the Presidential pardon for Ramadan as their case lacked sufficient evidence thereby being dismissed and now continue to conduct anti-GIRoA activity after their release; the release indicates that ANSF/CF must ensure the detainment of AAF through indisputable evidence
- Explosives used in Nangarhar IEDs are produced in Pakistan and shipped into Nangarhar using household good trucks traveling to Jalalabad, Nangarhar

## SIGNIFICANT ACTIVITY

### 1 x SIGACTS

- ABP REPORTED IED FOUND

 DECL: 20340922

- ★ CENTER GRID
- TARGET(S) COVERED

- EI's:**
1. Identify Local Nationals digging in or next to roads.
  2. Local Nationals loitering in groups of 3 or more personnel on or next to roads.
  3. Identify movement of munitions, weapons, equipment and supplies.
  4. Identify suspicious objects placed on or next to roads.
  5. Identify MAMs with weapons within 500 Meters of roads.
  6. Identify possible illegal traffic control points along roads.
  7. Traffic jams or congestion of 5 or more vehicles.
  8. Disturbed earth in or along roads.
  9. Movement of 3 or more vehicles traveling together.
- Production:**
1. TF ODIN-A provided coverage of 10 target(s).
  2. TF ODIN-A produced a total of:
    1. 01 IDPs
    2. 00 Highlight Video
    3. 00 Storyboard Products
  3. Supplementary Imagery
    1. 00 National Imagery
    2. 00 TIGR Derived

**Justification for Imagery:** TF Gryphon requests FMV/EO/IR IOT assist in planning future operations in the Kot District. Identify Local Nationals digging in or next to roads, Local Nationals loitering in groups of 3 or more personnel on or next to roads, identify movement of munitions, weapons, equipment and supplies. Identify suspicious objects placed on or next to roads, identify MAMs with weapons within 500 Meters of roads, identify possible illegal traffic control points along roads, traffic jams or congestion of 5 or more vehicles, disturbed earth in or along roads, and movement of 3 or more vehicles traveling together. The lack of FMV will hinder CF/ANSF general movement in the area, and pose unnecessary risk to both mounted and dismounted troops.

**TF-ODIN Jalalabad Comment:** All significant activity was reported to the unit VIA mIRC. At 1841Z, TF Gryphon requested an imagery derived product (IDP) of a suspicious compound.

- ★ 22 August – 20 September – Ramadan
- ◆ 3 September – Preliminary results
- ♦ 16 September – Lailatul-Qadr (Night of Power)
- 17 September – IEC certifies presidential election
- ☆ 20 September – Eid-al-Fitr (Generally lasts 3-5 days)
- 🇵🇰 01 October – Presidential run-off, if needed
- 🇵🇰 17 October – Inauguration (if no Run-off)

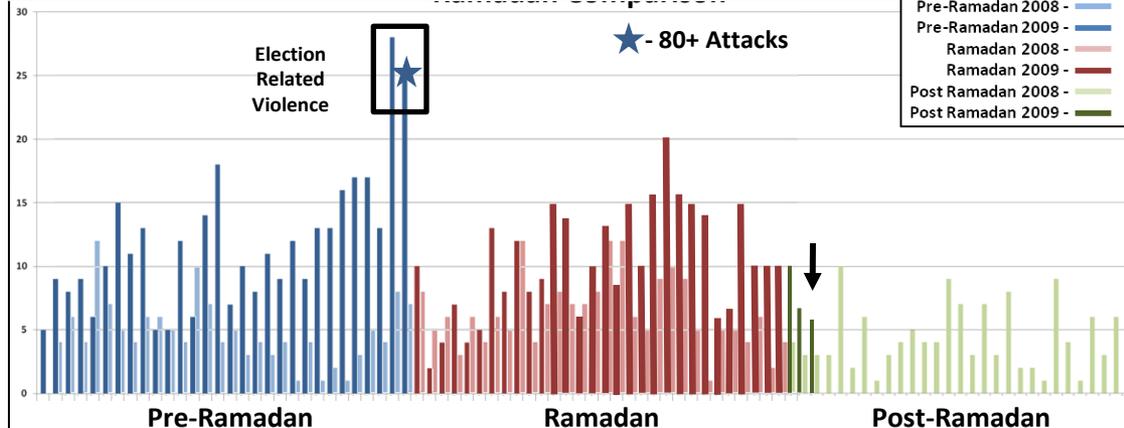

## Significant Date Threats and Assessments

### Ramadan

- During this period, there has been no decrease in activity that has been attributable to Ramadan. The increase observed during the latter part of the Pre-Ramadan period is a direct result of election related attacks. Supply issues will be the biggest factor contributing to the decrease observed during this Ramadan period. Reporting continues to indicate attacks will commence once supply levels return to acceptable amounts.
- The timing of Ramadan this year will likely see insurgent and criminal activity remain increased across N2KL due to favorable weather conditions, the peak of the fighting season, as well as election related events and a possible election run-off.
- Attacks will likely recommence once supplies return to an acceptable level. These attacks will focus on CF bases to avoid local casualties. Election results being released just after the Laiatul-Qadr (Night of Power) observance could provoke demonstrations and increased propaganda. Large crowds will present viable targets for possible suicide bombs however to avoid negative IO, AAF will refrain from such attacks instead targeting ANSF, CF and GIROA facilities.

2008 – 2009
