On the way to the new precinct the team conducted a joint patrol with 2 Iraqi Police vehicles to and from the new precinct. At the precinct, the Provost Marshal was given a tour of the building which is in much need of work. The building has no running water or electricity. It sits in the middle of a business and housing area which limits the number of vehicles that can be parked there.

(BC0022) 'Al Kadhimaya Patrol Police Station (West): (TRA Level 2) The team was unable to perform any training today due to the shortage of available IP at the station. The Captain also told the class his lack of equipment sometime prohibits him from properly processing a crime scene. The team will look into getting a crime scene kit for the station. The team then spoke to Major [redacted] and Captain [redacted] about the ongoing fuel issues at the station. When the IPs travel to get fuel, the attendant turns them away or shorts them. Captain [redacted] said the station is supposed to receive 1600 liters of fuel per day, but they would be lucky to see 100 liters per day. This shortage of fuel negatively impacts the station as the IPs can not patrol or respond to their sectors. The team conducted a spot inspection of the guard towers and found the weapons were functional. The military has located weapon cleaning supplies that will be issued to each of the towers so the weapons can be properly maintained. The team spoke with the IPs and informed them that, during their last fire fight with insurgents, they had suffered weapons malfunctions and these malfunctions can be reduced with proper maintenance. This plan was carried out on subsequent station visits.

Training was conducted covering how to properly set up a vehicle check point. New IPs watched senior IPs set up and demonstrate a vehicle check point. After the demonstration the new IPs practiced what they observed. Training was also conducted for the vehicle fleet supervisors. The team was informed the request for replacement tires for patrol vehicles was rejected by Rusafa because the tires were too expensive. The team will scan and forward request documents to the Rusafa HQ team so they can check on the status of the request.

(BC0109) Nahrawan Local Police Station: (TRA Level 3) The team conducted the final day of the "direct action team" class. The station now has 34 IPs trained as a direct action team.
