9. I, [redacted], WANT TO MAKE THE FOLLOWING STATEMENT UNDER OATH:

After the Shooting Stoped I got out of my position I pulled my Aid bag out of the CAT and ran to the Front of the TC where Anderson was. The time From when the fire stoped to when I reached him was between 45-60sec.

When I reached him there was 3 or 4 people gathered around him, his OTV was open and someone was elevating his legs. I instruted the person holding his legs to lower them. I tested responsiveness by yelling his name and twisting his right nipple (this is more effaive, and has less chance of complicating thoracic trama from a Sternal rub) his was unresponsive, the pt groaned once or twice [redacted] but this was not in conjunction with the responsiveness check. At this time the pt was exhibiting Kursal breathing pattern, (Sporadic deep respeations without rythem, last breaths before respratory failure) I started my assesment (rapid Combat trama) while cutting off the pt clothing, my "respe hook" (a small tool with a hilded recurved blade) was not cutting well so I had to switch to my Sheals. I started my assment with the "responsiveness check above, then moved to the Combined airway/circulation/breathing check, I observe the above breathing pattern the pulse was checked at the Carotid (neck) and was rapid and [redacted] weak, I secured his airway with a "J" tube by inserting it upside down until it touches the top of the mouth then turning it 180° to prevent the toonge from falling back and bloking the airway. The tube was an 8cm, slightly too small but was the best one in my vest. I then started my Pystal assesment, Neck, head, 3 eyes, only finding was Constrictal pupils. Chest was negitive for trama, abdomen had a Small hole with a trickle of blood, in the left lower quadrant, legs & arms were negitive for trama. I removed his vest w/assistance and called for a litter and my evac bag that had litter Straps in it. Total time of assesment 45sec
