Subject: HOT! UPS REPAIR UFR FOR BLDG 570

Please use this version (I went over it with) and get it to J8 ASAP. We will likely incur overall project delays which will likely cause 2nd and 3rd order costs and impact on other installation related contracts (CCJ6, Security, etc) if we don't get this funding to PCCIE by end of week.

**This is result of the MILCON contractor's mistakes which caused damage to the UPS equipment
