

TAMPA PUBLIC SWIMMING POOLS

Water Safety Tips

- Always supervise children around a pool
- Fence and cover your pool. Make sure the fence gate is self-closing and self-locking
- Use a pool alarm
- Do not place objects near a fence that children can climb onto to get into the pool
- Keep a life ring near the pool at all times
- Be sure the telephone is handy whenever you are using the pool
- Dive safely. Know whether the water is deep enough, dive only in the deep end of the pool and never dive into water when another swimmer is nearby
- Remove vegetation and other obstacles to be sure you have a clear view of the pool from inside the house
- Drain standing water from pool covers. Even a few inches can be dangerous to small children
- Never use a pool after drinking alcohol or taking drugs
- Use only non-breakable items in the pool area. Never allow bottle or glass around the pool
- Enforce the buddy system – never let anyone swim alone
- Don't enter the pool if you can't see the bottom of the deep end of the pool or the water is cloudy
- Never eat or chew gum while swimming – you might choke
- Never swim under diving boards and slides
- Go down slides in a sitting position with your feet first. Never go down headfirst or you might injure your head, neck or back

Swim fees:

Junior/Senior \$2.00 per session
